

MG KAUNG PYAE THEIN TUN

FULL-STACK DEVELOPER — BACKEND FOCUS

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 2+ years of experience designing, developing, and maintaining reliable, scalable backend systems and RESTful APIs using Laravel, ASP.NET Core, PHP, and MySQL/MSSQL.

Skilled in integrating third-party services and external APIs, secure authentication (RBAC, Sanctum, JWT, OAuth), database design and optimization, and ensuring system security, performance, and scalability. Experienced with Docker, CI/CD pipelines, and cloud deployment for reliable production delivery.

Strong problem-solving and analytical skills with a track record of collaborating closely with frontend developers and cross-functional teams in Agile environments, taking ownership of tasks, and proactively proposing technical solutions.

WORKING EXPERIENCE

Full Stack Developer

ITVisionHub Company Limited | Oct 2024 – June 2026

Engineered scalable web applications using PHP, Laravel, React.js, ASP.NET, and Livewire with a focus on performance and maintainability.

Architected RESTful APIs and integrated external services to support scalable and modular system design.

Implemented secure authentication and real-time functionality using Firebase.

Optimized MySQL queries and database indexing strategies, reducing page response times by approximately 30%.

Automated deployment processes using GitHub Actions CI/CD pipelines, reducing manual deployment effort and improving release consistency.

Guided junior developers through mentoring and code reviews, improving overall code quality and team productivity.

PHP / WordPress Developer

GMO Z.com ACE

Developed and maintained responsive and user-friendly landing pages using PHP, WordPress, JavaScript, AJAX, HTML, and CSS to support business and marketing requirements.

Built interactive web features using JavaScript and AJAX.

Collaborated closely with development and business teams in Japan and Thailand on API integrations, including Mermaid API, to discuss technical requirements, resolve integration issues, and deliver smooth system integration.

Created workflow automation solutions using n8n to improve business processes.

PROJECT SUMMARY

cursorLine — AI Chat Platform

An AI-powered chat web application built with Laravel and React, integrating the Groq API for real-time AI chat and Stripe for subscription-based plan payments. Focused on backend and database performance through caching, indexing, normalization, and cursor-based pagination.

Technologies: React.js, TypeScript, Redux, Laravel, MySQL, Redis, Groq API, Stripe API, MVC, OOP.

Integrated the Groq API to power real-time AI chat responses within a Laravel + React application.

Implemented Stripe subscription and payment processing for paid plan management.

Designed cursor-based pagination for efficient, scalable chat history retrieval.

Applied Redis caching, database indexing, and normalization to optimize backend and query performance.

Built a type-safe frontend using React, TypeScript, and Redux for predictable state management.

CONTACT

Phone: 09 782 132 456, 09 673 029 662

Email: kaungpyaethaintun@gmail.com

GitHub: github.com/KaungPyaeTheinTun

Portfolio: kaungpyaetheintun.vercel.app

Address: North Okalapa, Yangon

EDUCATION

Bachelor of Computer Science

B.C.Sc (Computer Science)

2018 - 2026

TECHNICAL SKILLS

Languages

PHP, JavaScript (ES6+), TypeScript, C#

Frontend

React.js, Redux, Alpine.js, Tailwind CSS, Bootstrap

Backend

Laravel, ASP.NET Core, REST APIs, GraphQL

AI & Third-Party APIs

Groq API (AI chat integration), OpenAI API, Stripe API

Databases (SQL & NoSQL)

MySQL, MSSQL, MongoDB

Cloud & DevOps

Docker, DigitalOcean, GitHub Actions, Git

Architecture

MVC, N-Tier Architecture, OOP, Domain-Driven Design, CORS

Security

JWT, Sanctum, RBAC, OAuth

Testing

PHPUnit, Feature Testing, Code Reviews

Automation

n8n

TOOLS & DEVOPS

- Git & GitHub
- Postman
- CI/CD
- Figma

Training Management System

A multi-role training management platform designed to manage the complete training lifecycle, including course planning, scheduling, instructor assignment, student registration, attendance, assessment, payment, and certificate generation. Built with Laravel using N-Tier architecture, with a focus on secure role-based access, scalable database design, and maintainable system structure.

Technologies: HTML5, CSS3, JavaScript, Bootstrap, PHP, Laravel, MySQL, Docker, Git & GitHub, N-Tier Architecture, OOP.

- Implemented RBAC and secure authentication for Admin, Instructor, and User roles.
- Built course scheduling, attendance, automated grading, and certificate generation modules.
- Developed payment, invoice, and commission management workflows.
- Dockerized the application and designed a scalable MySQL database architecture.

Support Ticket Portal

A scalable support ticket management platform built with React.js and Laravel RESTful APIs to streamline the complete support workflow from ticket creation to resolution. The system supports role-based access control, organization-level ticket management, SLA tracking, secure API authentication, and a modular architecture designed for scalability and maintainability.

Technologies: React.js, Tailwind, Laravel, MySQL, Docker, Git & GitHub, Redis, N-Tier Architecture, OOP.

- Developed a complete ticket lifecycle management system covering ticket creation, assignment, status tracking, SLA monitoring, and resolution.
- Implemented RBAC, organization-level access control, and Laravel Sanctum authentication to secure users and ticket data.
- Designed and developed RESTful APIs with Laravel and integrated them with a responsive React.js SPA using Axios and React Router.
- Applied N-Tier architecture, MVC, Docker, Redis, and API-first design to improve scalability, maintainability, and system reliability.

LANGUAGE

- Burmese (Native)
- English (Conversational)
